

Dear Partners of SAP UCC Munich,

We would like to thank you all for the trusting cooperation, continued support, and partnership in this year. 2021 demanded a lot of flexibility from us in teaching as well as our further professional and private lives again – however, we want to take this agility as an incentive to continuously support you in the best possible way with the application of SAP solutions in virtual, hybrid, and onsite teaching.

Beyond this, we have accomplished a lot together in 2021:

For some of you, the **migration from SAP ERP to SAP S/4HANA** marked a major milestone 2021 – we are proud that we master this challenge together and thus pave the way for future-oriented, modern teaching in the area of ERP. Furthermore, we won **Signavio** as an exciting business partner in the field of **Business Process Modelling and Process Mining** for new curricula, and successfully proved our **hosting, operations, and infrastructure offerings** at the **SAP Partner Certification Program** in October this year. Additionally, we focused on the quality assurance and improvement of our curricula in the area of **SAP HANA, SAP S/4HANA, Global Bike (GBI), and Cloud** to push forward diverse advancements in our current and future curricula within the next years. The [conference proceedings](#) (DE/EN) from **SAP Academic Community Conference 2021 DACH** that took place at Zeppelin University in Friedrichshafen this year give a good review of the great projects in our community.

We are convinced that with your experiences from teaching and practice as well as your and our many new ideas, we will master exciting and challenging projects in 2022, too.

We hope that you can enjoy peaceful season's holidays and we wish you a happy and healthy start into the new year.

As usual, we will be available for you between the holidays and work-free days on Dec 24 and 31, 2021, via phone, e-mail and service desk.

With pre-Christmas regards,

Dr. Holger Wittges,  
and the SAP UCC Munich Team
