

Dear Partners of UCC Munich,

We are happy to announce a couple of novelties that we have been working on in the last weeks:

1. Move to SAP S/4HANA / Sunset ERP ECC

We very much appreciate that some of you already got in contact with us regarding the sunset of SAP ERP ECC and move to SAP S/4HANA. As announced a few weeks ago, a SAP UA webinar “Move to SAP S/4HANA” took place in early November for the English speaking EMEA community. If you haven’t had the chance to participate, please find the recordings of the webinars [here](#) (to access the link, please register for [SAP Learning Hub, Academic Version](#), join the Learning Room “SAP University Alliances Learning Room” and click on the special tab “Move to SAP S/4HANA”). On December 8th, 2020 and January 20th, 2021 there will be Q&A sessions “Move to S/4HANA Advanced” for lecturers that have development clients on a shared system or exclusive systems with their own, IDES or Global Bike (GBI) dataset in use. These Q&A sessions will be held in cooperation with UCC Magdeburg and should serve as a platform for the documentation of challenges as well as the exchange with other lecturers facing similar migration issues. For more information about the Q&As and registration please visit [SAP UCC EMEA Portal](#).

2. Training Offer “Introduction to SAP UCC” (EN):

On December 18th, 2020 we are offering a virtual introductory training for lecturers who would like to get familiar with the SAP UCC services. The aim of this course is to show you everything you need to teach integrated SAP solutions in your courses, to communicate with your University Competence Center and to contribute to the SAP UA community. Please register for the training via [SAP UCC EMEA Portal](#).

3. Training Offer “Process Mining with Celonis” (EN):

In response to the great demand there will be a virtual training on “Process Mining with Celonis” held on December 12th from 9 am to 4 pm CET. In course of this training you will be made familiar with the topic of process mining. Also, the company Celonis and the Celonis Integrated Business Cloud (IBC) will be introduced. Beside information on the connection of IBC to a SAP S/4HANA client, there will be hands-on sessions as well as best practice cases for its application in teaching. Please register for the training via [SAP UCC EMEA Portal](#).

4. Save the Date: SAP Academic Community Conference DACH 2021

We are happy to announce that SAP Academic Community Conference DACH (for the region Germany, Austria, Switzerland) will take place next year from September 13th -14th, 2021 at Zeppelin University Friedrichshafen. The decision if the conference will be held in a fully virtual or hybrid format will be made within the upcoming months based on the current Corona situation.

We hope that our offerings will meet your interest. We are looking forward to your participation in the respective training and sessions. Please don’t hesitate to contact us in case of any questions.

Kind regards,

Prof. Dr. Helmut Krcmar and Dr. Holger Wittges
with SAP UCC Munich Team
