

Dear Partners of UCC Munich,

hereby, we would like to inform you about important news regarding the move from SAP ERP ECC to SAP S/4HANA. In the following, we summarized all main points for you:

- As announced at the SAP Academic Community Conference DACH in September 2020, the SAP ERP ECC sunset is planned for September 2021.
- The new solution replacing SAP ERP ECC is SAP S/4HANA. The GBI (Global Bike Inc.) model company and data set will be further developed only for SAP S/4HANA from now on.
- There will be several web sessions covering the migration from SAP ERP ECC to SAP S/4HANA offered in English and German within the next days and weeks. Please check out the attachment for specific region, dates and time of the web sessions. Registration can be done here.
- We would highly recommend all lecturers who are currently using SAP ERP ECC to attend the web sessions. If you cannot participate, please just contact us via support@ucc.tum.de and we will send you the recording of the web session.

In case of any further questions, please don't hesitate to contact us via our Service Desk or support@ucc.tum.de.

Kind regards,
Dr. Holger Wittges
and the SAP UCC Munich Team
