

## Services for teaching, research and co-innovation

SAP University Alliances is a global program that provides more than 3,000 universities with free SAP software licenses for academic purposes. Within this program the SAP University Competence Centers (UCC) host SAP solutions for teaching, research and co-innovation.

In addition, UCCs develop and manage academic teaching materials to assist lecturers and researchers. While UCCs assure 24/7 availability of complex system landscapes and support users closely, faculty members can fully concentrate on their core competencies: teaching and research.

By using our scenario-based and practical curricula on latest SAP solutions, lecturers and students can reach their full potential. Our comprehensive teaching materials consist of presentations, case studies and hands-on exercises. Additional teaching tools facilitate continuous student assessments and foster group discussions.

Our experts can support you through all phases.

# Transform Way Your Business Operates with SAP Signavio

Are you tired of manually managing your business processes? Want to eliminate errors and streamline your operations? Look no further than SAP Signavio!

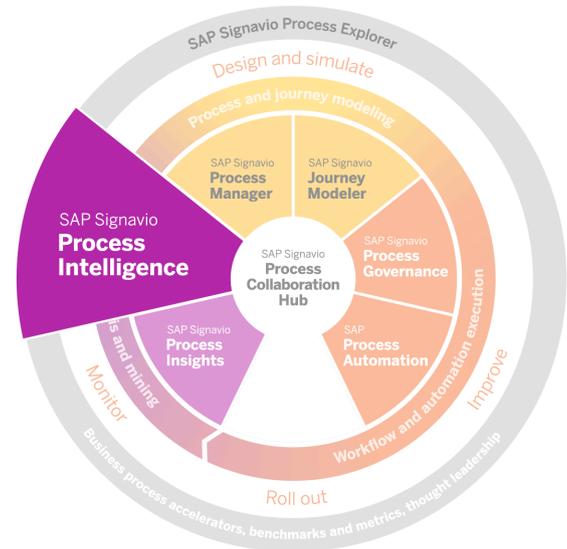

With Signavio, you can effectively map out all of your company's processes, from HR to finance to supply chain management. By visualizing each step of these processes, you can identify inefficiencies, redundancies and gaps, and work towards a more productive and cost-effective solution.

SAP Signavio Process Transformation Suite is a cloud-based solution that is made up of powerful and interconnected tools that enable organizations to understand, innovate, and transform business processes and journey models continuously, quickly and at scale.

## SAP Signavio Process Intelligence

SAP Signavio Process Intelligence is a process mining solution that enables collaborative efforts to achieve excellence in operations and experience on a large scale. It helps in reducing the time taken to gain insights and identifying ways to improve performance and efficiency. With a data-driven approach, it fosters continuous transformations and initiatives for process excellence across departments, system landscapes, and data sources.

- Perform process mining, analysis, simulation, modeling, and collaboration in the same collaborative environment
- Incorporating insights and analytics from SAP Process Intelligence into the process and journey models
- Connecting the journey models with process mining and experience data

## Curriculum Overview 'Process Mining with SAP Signavio Process Intelligence':

### Presentation Slides

- Introduction to Process Mining
- Introduction to SAP Signavio
- Introduction to SAP Signavio Process Intelligence

### Exercises

- SAP Signavio Process Transformation Suite UI
- Global Bike Sharing (GBS) modeling

### Case Studies

- Process data preparation
- Process data import & process creation
- Process investigation

#### Trial Account

SAP UCC offers one-month trial access to a Signavio system free of charge. If you are interested in a trial account, please register at [support@ucc.tum.de](mailto:support@ucc.tum.de).
